#### **BP02: 01.010 Governance Structure**

Cascadia College will operate through a system of shared governance by which there will be collaboration with all College constituents to participate in organizational decision making. This collegial advisory process will include, but not be limited to, decision making for determining performance measures of the institution, recommending policy to the President, and participating in organizational strategic planning, including making recommendations for the setting of priorities related to the allocation of College resources.

The College governance system is to be advisory to the President of the College in an environment of open dialogue. Administrative procedures will be developed to define the governance structures of the College. The President retains the authority for the final decision on any issues related to the management and operation of the College. The Board of Trustees in collaboration with the College President, and after any constituent group(s) has presented its position, retains the authority for the final decision on any policy related issues.
