

**Networking Infrastructure Technology**  
**Associate in Applied Science-Transfer**  
**91 credits**

The Associate in Applied Science (AAS) degree in Networking Infrastructure Technology is a professional technical degree that prepares you for a career in networking with an emphasis on infrastructure development. This program is designed to meet current industry demands in the field of information technology. Throughout the degree, you will successfully work both independently and as part of a team to design, implement, and maintain an organization’s hardware and software network infrastructure. In this program, you will:

- Acquire and understand the fundamentals of networking, hardware and software, and how to support and maintain computers and networking equipment
- Evaluate how to design network architecture strategies and implement networking technologies to build data infrastructures
- Obtain and apply virtualization and application infrastructure skill sets to integrate best practices for network administration by utilizing innovative technologies.

**Completion Requirements**

The Networking Infrastructure Technology AAS-T Degree is a professional technical degree that requires at least 91 credit hours in college level courses (numbered 100 or above), a minimum cumulative 2.0 grade point average, a minimum of 25 credits from Cascadia, and completion of all of the requirements for this degree. Students must meet with an advisor to complete and submit an application for graduation.
