

# Setting up Your Android Device for Eduroam

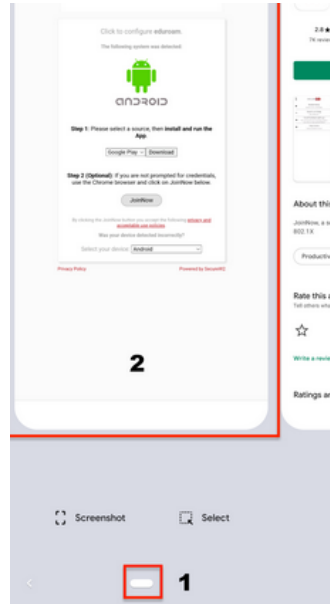

1. Open Chrome web browsers and navigate to <http://onboard.wifi.cascadia.edu>. From on campus, you can access this site from the Cascadia-Guest wireless network.  
**NOTE: Other web browsers will not work correctly.**
2. Tap the “Download” button to open the Google Play Store.

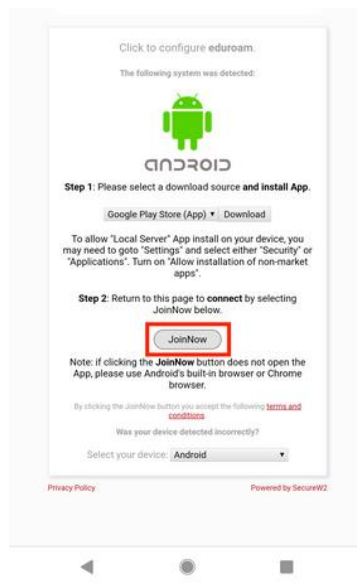

3. Tap the “Install” button to install the SecureW2 JoinNow software.

4. Tap your device's "Overview" button and select your web browser to go back to the onboarding website.

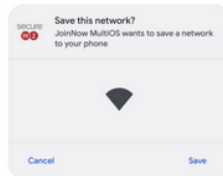

5. Tap "JoinNow".

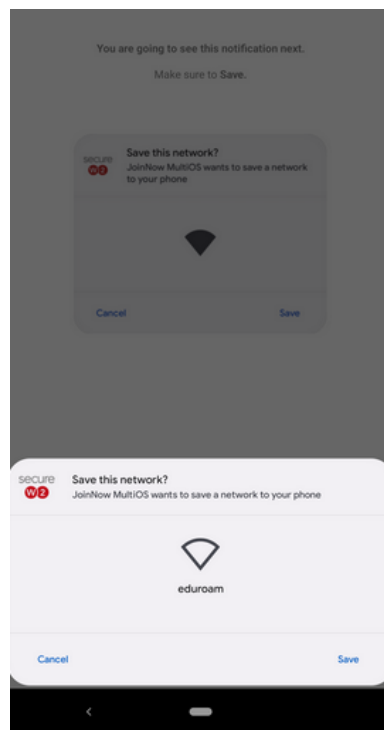

6. Tap “Next”.

You are going to see this notification next.  
Make sure to Save.

Next

7. Tap “Save”.

8. Once setup completes, you **can** uninstall the SecureW2 JoinNow software.  
As of Android 12, this will no longer remove your *Eduroam* profile.

Your Device is now Configured for  
eduroam!

To check your Connection:

[Go to Wi-Fi Settings](#)

Quick Tips:

If you have trouble connecting, stop start your Wi-Fi.

9. When your device is in range of an *Eduroam* network it will automatically associate.
